

NEW POSITION

Senior Microbiologist and Laboratory Manager

- Leading the Next Frontier of Gut Health

Nimble Science is working with partners around the world to advance next generation microbiome-based diagnostics and therapeutics by leveraging our first-in-kind capsule-based sampling technology to perform liquid biopsies directly from the small intestine. As a Senior Microbiologist and Laboratory Manager, you will be responsible for providing technical expertise and leadership throughout the organization.

You are a passionate and dynamic scientific leader with an entrepreneurial spirit ready to dedicate yourself to taking Nimble Science and the human microbiome field to the next level.

RESPONSIBILITIES:

The Senior Microbiologist is an integral part of a team who is innovating novel diagnostic solutions and building a powerful multi-omics database for Nimble and our customers. Through their experience and leadership, they advance a team working to optimize novel methodologies and establish laboratory and quality control procedures.

The Senior Microbiologist:

- Invents, establishes, and validates new methods to handle novel types of biological specimens from our capsule-based sampling technology.
- Develops new sample processing and extraction protocols for multi-omics analyses of the samples.
- Leads and contributes to R&D projects, including protocol design, data analysis and reporting for scientific presentations and manuscripts.
- Prioritizes workload for laboratory analysts, schedules testing according to performance expectations, ensures test sample results are reported in a timely manner to meet the customer requirements, as well as internal and external communication.
- Ensures that excellent documentation, controls, and capabilities are in place to maintain data integrity, and ensure timely and effective actions are taken.
- Works within a regulated environment, supporting the Quality Assurance Manager including reporting of non-conformance events, auditing and SOP development.
- Trains and mentors laboratory personnel.
- Participates and support customer and regulatory audits as a SME in Microbiology.
- Acts as the Biosafety Officer for the BSC Level-2 laboratory.

NEW POSITION

Senior Microbiologist and Laboratory Manager - Leading the Next Frontier of Gut Health

QUALIFICATIONS:

- PhD / MSc in Microbiology
- Track record demonstrating innovative and creative mindset
- Minimum 5 years of hands-on experience working in a microbiology laboratory in a GMP facility and a BSC Level-2 lab.
- Demonstrated knowledge of aseptic processing.
- High degree of knowledge of computerized information systems.
- Highly developed troubleshooting skills
- Working knowledge of GMP, GLP and HPFBI guidelines, sterile ISO-guidelines and safety guidelines.

You are a leader, a team player, an innovator and a problem solver.

Position Details:

- Position is full time permanent.
- Onsite in Calgary, AB (remote work is not possible)
- Compensation includes employee stock options & benefits
